Steelite-Utopia Logistics

The capacity of the new warehouse is more than three times greater than our original warehouses.

This allows us to hold in excess of 30,000 pallets under one roof, preventing double handling of goods and giving constant visibility of all stock using our new state of the art warehouse management system.

15 dock levellers mean there is no need to unload containers outside, bringing benefits in terms of speed, less product damage, and a better and cleaner working environment.

It facilitates our drive to improve customer service, increasing the speed of response, packaging integrity and picking accuracy.

It allows partner distributors to expand their businesses with our range of original and stylish products.

Made For Life

The Steelite International Lifetime Edge-Chip Warranty is your assurance that all Performance and Distinction products manufactured in our UK factory are fit for purpose.

All Performance and Distinction products are made with high-alumina content to ensure ultimate strength. Vitrified Ceramics prevent crazing and cracking that lead to bacterial ingress over time, thus enhancing sanitation and food safety efforts. Each piece is inspected, examined and tested so you can be confident it will withstand the rigours of the modern commercial kitchen and remain chip-free. This commitment to quality excellence ultimately results in product that you will replace less often – great for your kitchen, great for your long term costs and great for the environment.

Environmental & Sustainability Practices

Steelite International work closely with a number of suppliers and organisations, and are continually monitoring, developing and improving procedures to create minimum impact on the community and environment, while ensuring maximum efficiency and cost savings for the future sustainability of the business.

Steelite International is a member of The Green Organisation that rewards and promotes environmental best practice around the world, and the Staffordshire Business & Environmental Network, which aims to help local businesses reduce environmental impacts while also generating profits.

We have a dedicated and innovative approach to caring for the environment. In 2019 Steelite were awarded an engineering gold Green Apple Award for the implementation of a waste water centrifuge system.

Our new centrifuge system works by spinning waste material out of waste water at very high speed, the water is separated from waste glaze and then reclaimed saving around 20 cubic metres of water per day. This has dramatically improved the quality of waste water that does leave site. Apart from significantly reducing water, it saves glaze and lowers energy usage on site too.

In 2007, the business became one of only five companies in the UK to install a Lamella system. Steelite is the only tableware manufacturer to use a Lamella system for recycling clay waste.

In addition to clay recycling, fewer chemicals are now required to separate waste. This has a positive effect on the environment and water discharged from the site is also purer.

The Lamella has significantly reduced Steelite International's impact on the environment. The company now recycles in excess of 99% of manufacturing waste. In 2010 we received a Green Apple Award for the Lamella project.

Urban

Heightened senses, amplified presentation

Urban appeals to a sharper, city aesthetic where food is still tied to the traditional values of honesty, integrity and authenticity, but requires a slightly more formal, more defined and refined presentation style. Emulating a concrete look, Smoke is a new collection of tableware that takes its inspiration from the aesthetics associated with the act of cooking. The subtle and nuanced tones of grey contrast with the darker reactive elements to mirror the effects of browning and searing, creating a connection between the food and the plate.

Craft

The original Craft

Steelite is proud to introduce four new shapes to the iconic craft collection, bringing a stacking element that adds an exciting dimension to the tablescape. Craft is inspired by hand-crafted, simple country wares made by generations of potters over hundreds of years. The range embodies the beauty of rich, lustrous glazes applied by hand, and celebrates chance effects and reactions which occur naturally in the kiln. The gem-like glazes married to simple forms and shapes produce a unique and individual appearance, giving Craft a rustic "joie de vivre".

Revolution

Nuanced artisan experience

Using reactive glazes that change in colour and intensity depending on their application, Revolution glazes are specially formulated to enhance all the nuances experienced in their execution. Applied by hand using a revolving motion, the path the brush travels across each piece is evident in the fired result. The glazed surface of each piece in the range is as different and unique as the artisan that created it. This provides an ideal platform for Chefs to showcase their art, no matter what the cuisine style.

Revolution Edge

Casual and easy-going style

The use of hand-applied reactive glazes on Revolution Edge frames food beautifully, allowing for a slightly more formal approach to relaxed presentations. Revolution Edge allows food to be presented on a clean white platform complemented by a contrasting colour field. This has the effect of highlighting Chef's creativity, allowing it to speak for itself.

Revolution Edge can be used as a single colour presentation or mixed and matched freely with others in the range. It also co-ordinates beautifully with Revolution for a more casual and easy-going style.

The Nordic region has become synonymous with Chefs' skills in developing dishes that utilise the very best local ingredients and presenting them in a sympathetic and contemporary manner. The simple but sophisticated plate profiles allow Chef's space to present dishes that can 'breathe', whilst simultaneously being framed by a deep, gently-curving rim. This enables the ultimate showcasing of some of the most innovative and influential dishes belonging to this cuisine.

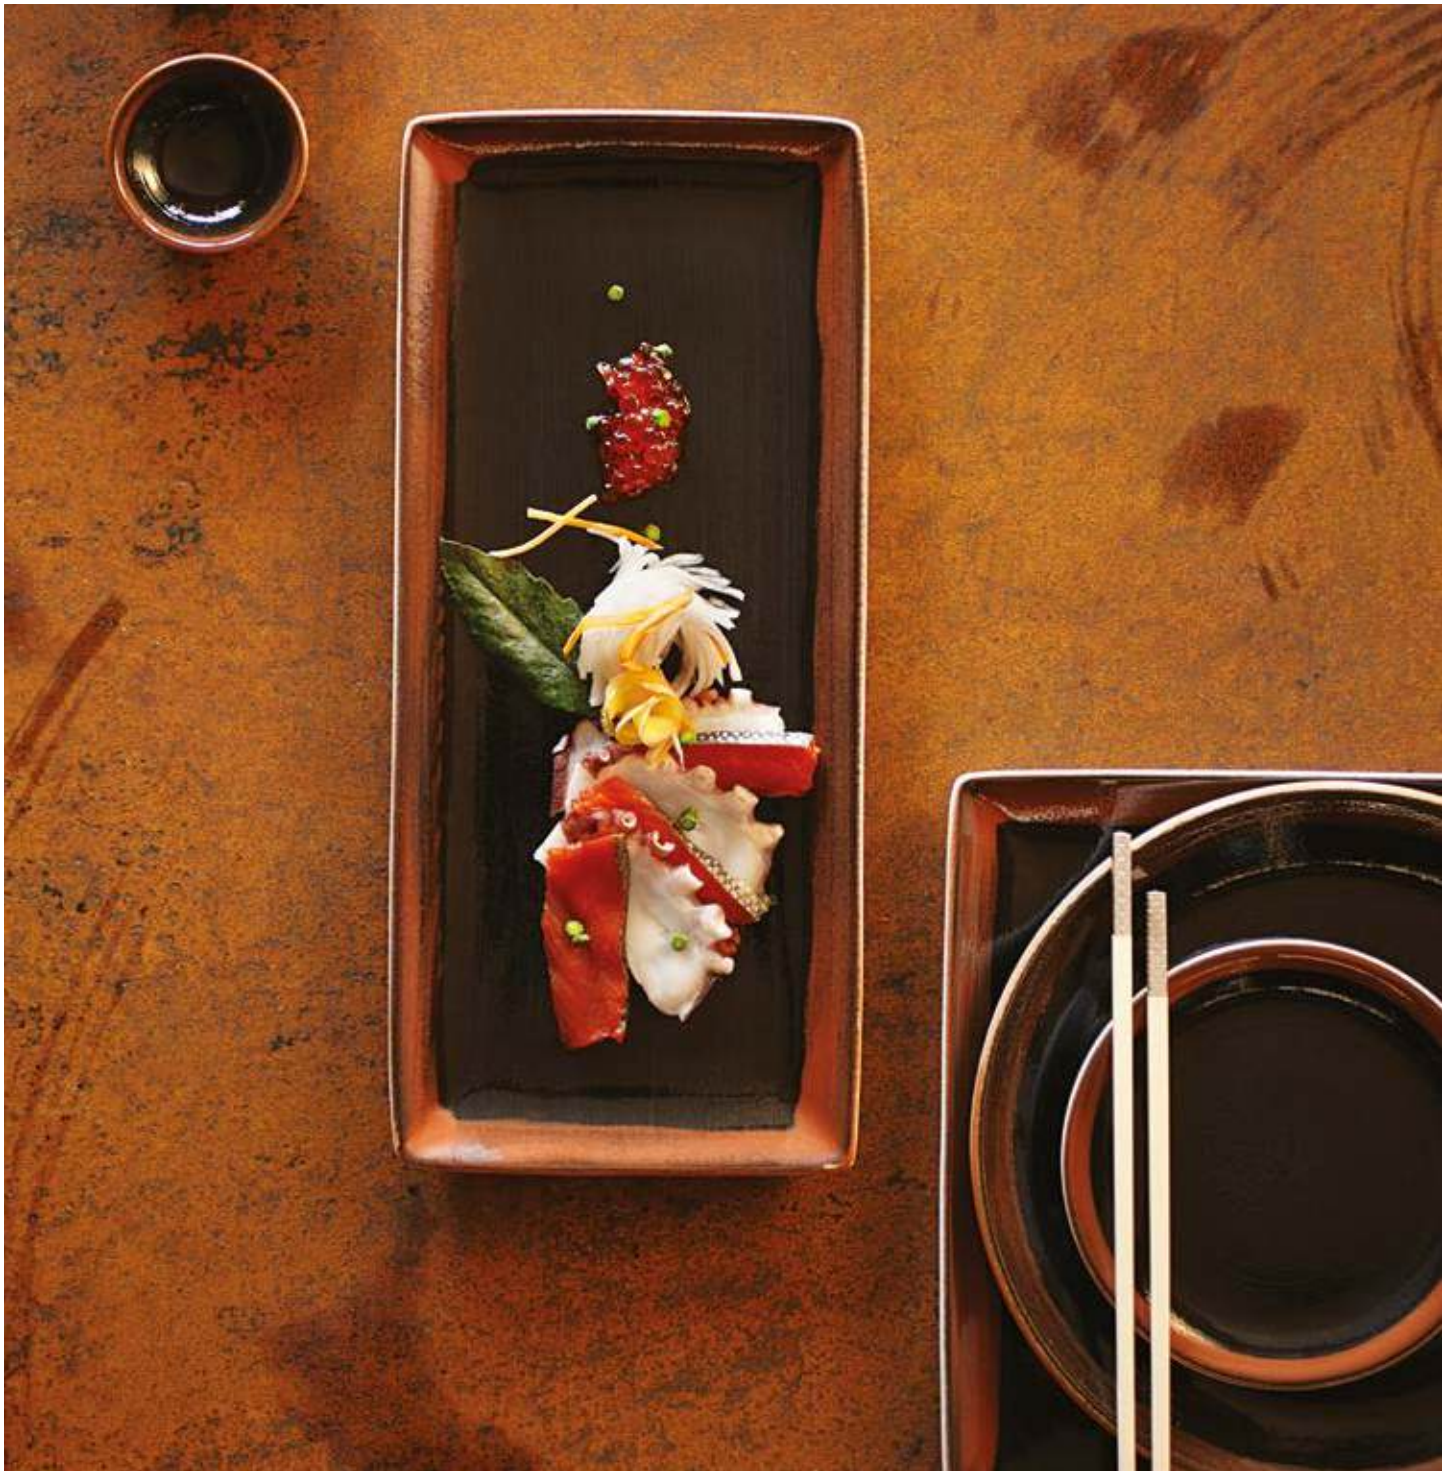
Koto



David Kinch

A daring pattern for a dramatic presentation

Koto, one of Steelite International's most unique ranges, was designed in collaboration with world renowned Chef, David Kinch. The inspiration was drawn from ancient Japanese Tenmoku Glazes. These beautiful glazes vary subtly in texture and tone from piece to piece, embodying the craft of the traditional potter. The pieces are hand finished with a rich iron red glaze, which interacts in the kiln to produce a warm, organic, lustrous effect. The deep black textured surface allows food to be perfectly framed, adding drama and contrast to your presentation.

Delicate and unique design

Inspired by the beautiful fauna and flora of tea gardens around the world, this delicate hand-painted design effortlessly lends itself to the Great British tradition of afternoon tea. Composed of 16 pieces, all hand decorated in the heartland of The Potteries, each item presents a unique design and boasts all the essentials for a classic afternoon tea offering. Evoking a timeless impression, details reflect floral patterns, subtle scalloped border accents and, as a final charm, a golden bee motif that honourably glimmers against the gentle green hues. Simple, yet intricately detailed, this fine bone china teaware will bring elegance to every teatime experience.

Reed

An elegant pattern on a bone china canvas

Frost

Frosted edge

This collection has been created in collaboration with two-starred Michelin chef Brett Graham. The rimless design means there's no visual distraction from the finest cuisine, while the frosted edge prevents finger marking as the plate is set down on the table. Extra weight has also been added to the centre of each plate, to optimise retention of heat or cold.

Rene Ozorio ◦ Porcelain

Essence

Profiles in elegance

Essence is a new shape in porcelain designed by Rene Ozorio. The collection of rimmed presentation and banquet plates, coupes, trays, and bowls provide a clean, modern look for tabletops and food presentation.

For Rene Ozorio, Essence signifies “the return to the pure nature of white porcelain in a shape whose sculptural simplicity speaks of modernity.” The thin, elegant profile provides a light & contemporary product that is durable and ideal for hotels & restaurants.

Atelier

“In praise of shadows” ~ Jun’ichiro Tanizaki

Atelier: the name evokes the hand of craftsmen and the tradition of artisanal fabrication. The realisation of this fluid optical design was through the collaboration with artisans, who hand carved the models for each piece. The calculation of the embossment and the glazing produces an effect of ebbing water in the tide pools. Designed with fine dining in mind, the lightness in weight and porcelain colour speak of quality and craftsmanship.

“Atelier is inspired by nature, light and shadows. I was reminded of the days by the sea, watching the changes in the sand & pools of water brought by the ebb & flow of the tides. The element of water in motion.” ~ Rene Ozorio

Terrace

Simple, tactile, embossment

The Terrace range brings together the look and feel of Stoneware with the timeless appeal of a simple, tactile embossment. The range utilises semi-matt glazes which pool and interact with the embossed surface to give the impression of hand-worked, semi-precious stone.

The embossment is carefully arranged to draw the eye to the centre of each piece, where the focus is on the food, framing it perfectly. In addition to a useful range of standard coupe plate sizes, Terrace comprises a full suite of bowl sizes and shapes and a comforting beverage collection.

Off Grid Studio

The essence of hand–thrown stoneware

Steelite have teamed up with Off Grid Studio to create a unique collection of stoneware. A passion for hand-crafting ware on a potter's wheel led Off Grid Studio to start a business and build a 100% 'off-grid' home and pottery studio bordering a National Park in Gembrook Australia.

The raw clay body, representing the terra of the surroundings, is generally present in the minimalist stoneware shapes. Functionality and a strong connection to the hospitality industry drive the design process.

- Handcrafted aesthetic
- Fusion of form & function
- Unique collection
- Freezer, oven, microwave & dishwasher safe.

Fire NEW

Where earth meets flame

Fire from Off Grid Studio is designed by Potter Sam Gordon to blend the look of hand-crafted pottery with modern durability. Inspired by the raw beauty of wood-fired ceramics, Fire captures the essence of this traditional process, where wood is the sole fuel and the kiln requires constant attention to reach and maintain high temperatures. As the wood burns, its natural minerals vaporize and interact with the clay, creating organic, brush-like glaze effects that only nature can achieve. Offered in three semi-matte glazes, Smoke, Timber, and Ember, each piece is intentionally reactive, showcasing unique highlights, subtle colour shifts, and one-of-a-kind edge details. Available in nine shapes across coupe and presentation-style profiles, Fire pairs timeless craftsmanship with functional elegance for today's tabletop.

"Wood fired ceramics is in my opinion the truest form of pottery;
the clay is dug from the earth, touched by hands and transformed by fired wood." -Sam Gordon

Gembrook

The essence of hand-thrown stoneware

Gembrook consists of two colours, creamy white and deep grey, where each item is decorated with a sheer white, hand-applied glaze, allowing the beauty of the clay to show through. The bottom of each piece and small portions of the top are unglazed, to authenticate where the potter would hold each piece while glazing, resulting in double dips, drips, and exposed clay lending to its hand-thrown authenticity. Meanwhile, a handful of pieces flaunt a distinct indent, which mimics the thumb mark of the potter and creates a conversation piece for diners.

Steak Knives

High-quality knives

Created by designer Adam Simha, these are the knives you will always reach for, feel compelled to care for, and never want to put down. Adam's original knife designs are based on over 20 years of knife making, his own professional kitchen experience, and the custom knives he has built for working chefs. He provides service for these knives exclusively, giving him first hand feedback on every detail from material to blade shape to edge geometry, to hardness, to hardware.

"The knives I began making and enjoyed the most turned out to be knives for cooking, which brought me full circle back to the sphere of culinary arts." - Adam Simha.

Hollowick

Liquid Candles

Candlelight without the melted wax mess

Liquid candles from Hollowick are the ideal choice for lighting up the tabletop. These liquid fuel cells burn cleaner than solid wax candles and are disposable, making clean up quick and easy without the melted wax mess. Available in a variety of sizes, a strategically chosen liquid candle will sit low inside a table lamp in order to illuminate the colours or beauty of the lamp itself. With a burn time that is twice that of a standard tealight, Liquid Candles from Hollowick are staple for those restaurants & hotels looking for the elegance of live flame.

Proper use of liquid candles

In order to illuminate the colours and beauty of a lamp, select a liquid candle that sits low within the lamp, and does not touch the sides.

Corduroy

Corduroy plates feature a generous wide rim enhanced with colour catching ridges adding depth to the reactive glaze. Each piece of Drift is finished with a sponged contrasting colour to create a truly individual feel. The ridged texture takes on another dimension when applied to the outer walls of the complimentary pieces. A rich deep green casts dappled patterns across an olive ground, picking out the ridged body of each piece in the concise Fern collection.

Eternum

Created in 1924 and based in Belgium, Eternum is one of the most pioneering international cutlery suppliers in the world, with collections designed specifically for the Hospitality market. They offer collections from renowned designers in the field, to bring to market contemporary 18/10 and 18/0 collections.

They service 70 markets throughout the world, with Steelite-Utopia being their exclusive UK partner.

Embossment

The cutlery is embossed and then the reverse side is repolished to create a perfect finish. This method of personalisation is suitable for simple logos.

Etching

This method of personalisation can reproduce complex logos, the detail would only have to be simplified if elements became illegible due to the size that was required for the item. Etching provides very sharp definition with a black appearance.

Laser & Diamond Engraving

This method of personalisation produces exact replicas of logos, except for highly intricate designs.

Be individual with coloured cutlery

Any of the Eternum collections can be PVD coated in your choice of Gold, Bronze or Anthracite colours. The coating is Food Safe and is scratch resistant.

Storing:

- Placing rubber or plastic mats on large stainless steel surfaces usually found in industrial kitchens can help reduce metal marking to ceramics.
- Rubber or plastic mats can also be placed in stacking areas, trolleys or sinks to further reduce the chance of metal marking.
- Replace or repair any plastic coated racks that may have become worn and the metal underneath exposed, as this again could cause damage to your ceramics.
- Do not stack items more than 15" high.
- Only stack products that are designatedas stackable.

Using:

- Don't scrape off leftovers – wipe off with a paper towel or a plastic/rubber scraper.
- Do not slide items across each other to reduce abrasions.
- Minimise handling to reduce glaze abrasion.
- Be sure to rotate your stock to prevent uneven wear.
- Use cutlery that is of a high grade steel as a minimum requirement, as some cutlery in use today is made from low grade steel, which being soft in nature increases the chance of metal marking.
- Using metal utensils against ceramics can also cause metal marking, try to keep this to a minimum or use plastic utensils.

Washing:

- Seventy percent of product damage/loss occurs at the dishwasher table. To avoid such damage, ensure that the dishwasher table has sufficient space to store dirty items and avoid overloading trays or trolleys.
- To ensure the quality level of the product it is important to take note of the following:
- Items should be washed within 45 minutes of removal from the table and pre-rinsed.
- Abrasive cleaning aids should not be used, i.e. scouring pads, steel wool, etc.
- All items should be separated into type prior to washing.
- Stack ceramics separately to other crockery in the dishwasher such as cutlery or pans and ensure items do not vibrate against each other during the cycle.
- Avoid contact between ceramics, dinnerware and metals.
- Strictly follow recommended dishwashing procedures set out by the manufacturer and use the correct dose application of the detergent.
- The use of an approved detergent is recommended.

- For effective cleaning, we recommend that the dishwashing temperature and the final rinse be set between 55 to 60°C. Operating at higher temperature levels in order to wash crockery 'properly' is a definite case of overkill and detrimental to all tableware.
- Repair or replace any plastic coated metal in the dishwasher that may have worn away as this may result in metal marking.
- Overdosing on detergent or using excessively high temperatures will cause deterioration to the glazed finish or damage any decoration on the product.

Metal Marking:

- Metal marking occurs when a ceramic item comes into contact with metal surfaces or utensils, which can cause metal tracing to be left on the ceramic item due to certain types of steel being softer than the glaze of the ceramic.
- Despite the unsightly appearance of metal marking, it is not a cause for concern as it can be easily removed by the application of a gentle household non-abrasive cleaner.

Custom Decoration:

- Gold and platinum decorations are not microwave safe.
- Utopia ceramics are suitable for microwave use, however be advised that any decorated item that includes metal will not be microwave safe.
- Hand washing is recommended to prolong the metallic lustre of decoration.

To help maintain the look and feel of your tableware it is important to consider the washing process. Washing temperature, detergents, and water types are key factors when caring for your product whilst also ensuring that you do not let dirt and residue build up over long periods of time. The recommendations on the next page will help to maintain the performance of your product in service.

Always wash as soon as possible after use. Before loading into the dishwasher, rinse with hot water and avoid leaving food on china for any significant length of time.

Do not overload the dishwasher and ensure that the water temperature is in accordance with the manufacturer's recommendations. Ensure the dishwasher is regularly serviced and in good order. We strongly recommend using a rack with custom compartments to ensure that there is no impact during the washing cycle. Avoid overlapping and overloading the dishwasher.

There are many automatic dishwashing detergents available today to suit different operating conditions. It is important to select the correct one for the dishwasher as some detergents can cause corrosion and permanent damage to the tableware decoration. For any regions with hard water, it is suggested to use a hard-water detergent and rinse-aid.

Recommended dishwasher temperature for china is 69-74°C/156-165°F and a rinse at 83°C/181°F. A wash temperature of 69°C/156°F is recognised as the most effective for removal of food soiling, with less risk of damage to the decoration. We do not recommend the use of dishwashers for product with metallic trim.

The use of scourers will lead to damage on plates, often seen by visible circular scratches. We suggest not to use a scrubbing sponge and instead rinse the plate with hot water as soon as possible.

After washing, wipe with a damp cloth (microfibre) to remove any watermarks that may occur during the washing process. If watermarks are excessive check the dosage of rinse aid.

To remove coffee and tea stains, or any stubborn built-up dirt use Tannin Remover powder. Mix the powder with water and place the crockery in a bath of the solution for 30 seconds. Use a soft sponge to remove stains. Do not use a scrubbing sponge as it can damage the glaze.

Using higher temperatures or overdosing on detergent will cause deterioration to the glazed finish or damage any decoration on the product. Most dishwashers have a short wash or china/crystal cycle that should be sufficient for most cleaning of china.

Fine bone china should not be used for cooking purposes. Do not expose it to a naked flame and avoid use in an oven. Products with gold or platinum decoration must not be used in a microwave due to the metallic content.

Precious Metals

It is important to take additional care for items incorporating precious metals such as gold, silver, and platinum. These metals have a compromised technical and durability performance compared to ceramic colours. To maximise shelf life, we recommend hand washing and the use of a soft cloth to dry thoroughly before storage. Do not use abrasive materials when cleaning.

- Always stack separately to other crockery in the dishwasher to ensure items do not damage each other in the cycle.

Stainless Steel, though its name suggests otherwise, it is not completely 'mark proof'. It is much more resistant to staining or marking than other metals however contact with certain substances will start the process that leads to staining and pitting.

Storing:

- Never store cutlery where it can become damp, as this can cause corrosion.
- Store out of direct heat, as this can cause the metal to mark.
- Never leave cutlery with food on as many corrosive substances are found in food, such as acids, like vinegar and lemon juice, mineral salts found in tap water, fats and meat juices.
- Other corrosive substances are bleach and harsh detergents, so ensure your cutlery is not left to soak.
- Be sure cutlery is completely dry before storing in a dry location away from the kitchen.

Washing:

These products are specially designed to withstand the rigours of the Foodservice and Hospitality trade, including automatic dishwashing found widely in most businesses.

To ensure the quality level of the product it is important to take note of the following:

- When pre-rinsing cutlery ensure all food debris is removed before being washed.
- Follow the manufacturer's instructions, particularly in relation to adding dishwasher salt as excess salt can cause corrosion.
- Always wash cutlery immediately, never leaving it with food debris present.
- It is advisable to place cutlery vertically into dishwashers with the head up; and not too tightly packed together, this assists the water flow at the end of the cycle.
- Remove cutlery immediately after washing/dry cycle is finished and wipe over with a dry towel. If the cutlery is left to cool in the dishwasher, trace mineral salts and the dishwasher salt residue will settle on the cutlery in the moist atmosphere and start the pitting and staining process.
- Never mix stainless steel and silver plated cutlery in the same basket of the dishwasher the chemical reaction between detergent and steel can cause the silver plate to mark.
- Do not use the rinse and hold cycle on dishwashers with cutlery this will leave the cutlery to soak in water which can be damaging.
- Wood handled cutlery is not suitable for cleaning in a dishwasher.

PVD Coated Items

- For PVD coated items extra care should be taken.
- Whilst dishwasher safe, handwashing is recommended to preserve the finish.
- Avoid prolonged contact with acidic food types.
- Avoid abrasive pads and harsh or chlorine-based detergents.
- Remove promptly after washing and dry thoroughly.
- Do not leave to soak.

Steak Knives:

Wood Handled Knives

- Handwashing is recommended for the best performance and optimal product life.
- Wash knives with warm water and a mild detergent, rinse well and dry thoroughly.
- Water and harsh detergents will dull the finish and dry out the handles.
- It is recommended that the wooden handles be oiled as needed.

ABS (Resin) Handled Knives

- Low temp dishwasher safe.
- Wash knives with warm water and a mild detergent, rinse well and dry thoroughly.
- Not recommended for high temp dishwashers that exceed 167°F / 75°C.
- Knives should not be exposed to extreme temperature changes, which will cause the abs handle material to crack over time.

Stainless Steel Knives

- Dishwasher safe.
- Wash knives with warm water and a mild detergent, rinse well and dry thoroughly.

Blade Sharpening

- Serrated blades cannot be sharpened.
- Blades with no serrations can be sharpened as needed.
- The frequency will depend on how often the knives are used and how well they are maintained.

Types of Metal – What is Stainless Steel?

Choosing the right type of cutlery for what you need it for can be confusing, Utopia have tried to simplify this by splitting the ranges into different types of stainless steel 18/10 and 18/0. These ranges can be further identified through the colour coded collections.

Stainless Steel is an iron and chromium alloy containing more than 11% chromium. There are three types of stainless steel used to make cutlery:

18/10

This is used for contemporary cutlery except knives; it contains 16-18% Chromium and 8-10% Nickel. This is the only steel that can guarantee against corrosion when properly cared for.

AISI Code	Generic	Chrome	Nickel	Others	Subtotal	Balance
304	18 / 10 or 18 / 8	16–18%	8–10%	3%	29–33%	Iron

18/0

This steel is used for value cutlery e.g. Parish, Economy or some value options of Contemporary cutlery. Due to the high % of chromium, it is more resistant than 13/10 but not as resistant as 18/10.

AISI Code	Generic	Chrome	Nickel	Others	Subtotal	Balance
430	18 / 0	16–18%	-	2	18-20%	Iron

13/0 or Knife Steel

This steel is used to make knives, as it can be hardened to create a sharp edge. The quality used is AISI 420, containing 12-14% chromium. This is the least corrosion resistant form of stainless steel.

AISI Code	Generic	Chrome	Nickel	Others	Subtotal	Balance
420	Knife Steel	12–14%	-	2	14-16%	Iron

Handling & Care:

The correct handling and care of your Melamine buffet and tableware will enhance the appearance and longevity of the product in use. The following guide will assist you.

- Handle melamine dinnerware like any quality dinnerware.
- Clean as soon as possible to help avoid staining and protein build-up.
- Use only plastic pads or plastic type bristle to remove dried food.
- Pre-soak melamine products, if necessary, in a high quality pre-soak dishwashing detergent.
- Immediately remove any damaged or chipped melamine products from operational use.
- Melamine products can withstand heat up to 212°F (100°C).
- Do not use in oven, microwaves or expose to direct flame, this can cause cracking and blistering from the heat.
- Do not use with heat lamps, conveyor belts, or plate warmers.
- The use of serrated knives is not recommended on melamine products.
- To avoid chipping and scratching, do not strike melamine products with or on any hard surface while attempting to remove excess food.
- Do not use harsh or abrasive cleaners, steel wool, or metal scouring pads.
- Do not use chlorine bleach or chlorine-based sanitising solutions when caring for melamine products.
- Only use sanitisers developed for commercial use.
- To avoid chipping and scratching, do not overload your dishwasher rack.

Melamine is a thermosetting plastic that is strong, lightweight and hard with the look and feel of ceramic product. It is highly break and scratch resistant, but it is NOT 100% unbreakable, it can be scratched and broken.

Melamine is often used for dinnerware, mixing bowls and laminated counter tops because it resists acids, alkalis and most food stains.

Melamine is hard and smooth and can withstand some fairly warm temperatures, but it does absorb heat and will soften if it gets too hot. While melamine is perfectly safe when it comes in contact with warm temperatures, melamine is not microwavable.

In general, melamine products are not designed to withstand temperatures that exceed 100°C and should not be submerged in boiling water or placed in the oven.

Also, be sure to avoid exposure to hot objects or prolonged exposure to boiling water. Melamine is suitable for use over a bain-marie as the water is circa 70°C, to hold food above a temperature of 60°C.

Melamine is dishwasher safe (as long as the water temperature does not exceed the 100°C guidelines). Scouring powder should not be used, as it will scratch the surface, also never use chlorine bleach on melamine buffetware.

Destaining

- Periodically presoak melamine products before dishwashing to prevent staining and to maintain lustre.
- For staining, use an oxygen-releasing compound such as Dip-It XP (ECOLAB).
- Sponges or woven plastic pads are recommended for cleaning.
- Do not use harsh or abrasive cleaners, steel wool, or metal pot scouring pads to remove food or stains.
