SENSIS PLUS by

For decades, wine lovers have known that the shape and size of a glass significantly influence the tasting experience. But SENSIS PLUS goes far beyond that, transporting you to an unparalleled dimension of enjoyment:

SENSIS PLUS enhances already perfectly shaped glasses to reveal the true character and full complexity of a freshly opened wine or other beverage.

After years of development work, the Master of Wine & Master Sommelier RONN R. WIEGAND was one of the first to congratulate Eisch for their breakthrough:

„Remarkable! Congratulations on a real contribution to the enjoyment of wine.“

WHAT IS SENSIS PLUS?

- SENSIS PLUS reveals the full diversity and depth of the aromas immediately and impressively, intensifying the enjoyment of wine to an unprecedented level. The character and structure of the drink are not altered.
- SENSIS PLUS starts where a glass is already formally optimized – it is the perfection of beverage-specific designed glasses.
- SENSIS PLUS is a well-kept EISCH trade secret and should remain so permanently. That is why there is no patent application, which is only protected for 20 years.
- Even the EISCH employees carrying out the work are not told what actually happens during the completion of the glasses.
- SENSISPLUS works on a wide variety of flavour-rich beverages such as red and white wines, spirits, juices, etc.
- SENSISPLUS does not use any chemicals.
- SENSISPLUS is created on the finished, cold glass by a purely physical process, but not by a roughened surface or similar.
- SENSISPLUS is permanently retained, even when cleaned in the dishwasher. Only heating to over 200°C can neutralize the effect

Experience & Taste the difference

Take two glasses comparable in size and shape.

Pour the same amount of wine into both glasses and check the bouquet and taste after a few minutes.

About EISCH:

Eisch is a 80 years old traditional glass making family-owned company, born in the pure forest of Bavaria. Eisch has been combining the finest glass art and innovative elegance to create unique, hand-finished masterpieces since 1946. Precious materials such as gold and platinum stylishly enhance sophisticated rooms and meet pioneering technologies to intensify moments of pleasure.

Glass from Eisch quickly gained recognition in specialist shops as being exceptional in terms of craftsmanship and aesthetics. In an era of advancing machine production, the Eisch family reflected on the advantages and specific characteristics of handmade products, on glass in which the human touch remained evident: slogans such as 'poetry in glass' and 'handmade tenderness' aptly described the range.
